SmartDives Quads are IMCA D 043 compliant, in accordance with Marking and Colour Coding of Gas Cylinders, Quads and Banks for Diving Applications. All cylinders are supplied under valid TPED (Transportable Pressure Equipment Directive 2010/35/EU) certification and hold individual EC Type-Approval Certificates issued by a Notified Body. Each cylinder is accompanied by an Acceptance Certificate confirming that it has successfully passed the hydraulic pressure test and all other required examinations as specified in Clause 10 of ISO 9809-1:2019, and is therefore in full compliance with ISO 9809-1:2019 / TPED and the approved design type certificate.
